1996 : YEAR of the CANARY: 1996

THE Conspiracy, 1945 and counting, has run out of hate and gas. Fueled during Cold War I by genuine anti-Communism, the Paper-Tiger flummery of Cold War II evaporated into thin air when the Soviet enemy, shedding warfare's armor and horrified at the US arrogance and ignorance of EXPLO 007 and Grenada, quit the arms race. Ahimsa, non-forcefulness flourished.

> ...we must oppose the logic of confrontation with the logic of understanding .... (MSG, Paris, 1986)

PWM, the US Professional War Machine, booted, spurred and alone on the battlefield, claimed victory and bellied-up.

THE Conspiracy, searching for an enemy more permanent than Bosnia, can neither break the habit of maintaining a War economy without a War nor ask how many B-2's and Poseidons does it take to kick the deficit.

The balance-the-budget charade is seen from this Ivory Tower, as THE Conspiracy deciding to back or not to back its puppet's re-election. As of mid-January, he's IN.

The time is ripe for the aging techicians, bagmen, lieutenants and coordinators to listen to the still, small voice of conscience. Come clean with MEA CULPa and enjoy your golden years at peace with yourself and your God.

The Conspiracy Museum, 214 - 741-3040, is ready to help you with your next hurdles: immunity and severance-pay reward.

ANGELS, OWLS & CANARIES

To withdraw from working on the Manhattan Projeot in Los Alamos one year before the bomb was dropped, as physicist Joseph Rotblat did, elevates him into the stratosphere, just below the angels. The canaries TCM hopes to attract inhabit the underground.

Responding directly to his conscience, Rotblat's anti-nuclear protest was not only in silence but also with a change from warfare to medical science. Elected president of The Pugwash Conference in 1988, he shared the Nobel Peace Prize with that institution in 1995. Rarely does this purity remain involate a lifetime.

Though R S McNamara cannot qualify as a quasi-angel, he is no canary either. As a cabinet member finding himself at varaince with his president over the war in Indo-China, he resigned with malice toward none [but himself]. Sung thirty years ago his "...terribly wrong..." (p xvi, In Retrospect with Bruce VanDerMark, Time Books NY 1995) would have placed him with the Military-Industrial Complex owls. In no way is this intended to diminish the impact of his book, a bolt from the blue as PWM was being prepared for burial.

Among those who were not aware of THE Conspiracy, McNamara stands head and shoulders above the crowd. Our rogue elephant was a clever sneaky beast. And if ever the Archives release a document pointing to someone in the White House family with foreknowledge of the President's assassination in Dallas, that someone will not be the former Secretary of Defense.

It is nonetheless clear that within the thousand days the best of breed canary was hooked into a prominent role in that murder. →

CANARY NO. ONE

In the fall of 1978, Louis Steven Witt, 7209 Embassy, Dallas, TX, THE Conspiracy's alibi for TUM, The Umbrella Man was jolted out of his passive action to swearing to tell the truth before the House Select Committee on Assassinations. He testified that he was the man in Bothun 4, sitting on the grassy knoll with the umbrella on the sidewalk next to his feet. And he brought along his beat-up umbrella to prove it. Thirteen years younger and left-handed and he might have pulled it off.

When his bumbershoot was opened to look inside for the flêchette-launcher, it went all the way inside out. The immediate laugh that blew "the umbrella man theory" out the window made fools of staff, congressmen, media and audience:and of all but a few JFK researchers who knew better.

Of course it was theory that discovered TUM was the only person in Dealey Plaza in the correct position to inflict the President's Throat Wound of Entry at Z-187.

Of course it was theory that discovered that Witt first knew about JFK's assassination while he was attending a business lunch in New York City. TUM told us that was his alibi.

When therefore in 198? Jim Marrs called to find if we saw the remarkable similarity he a Jack White did between Witt's and TUM's pompadour hairde and hairline, the light went on.

While TUM launched La Flêchette in Dealey Plaza, Witt lunched as TUM in Toot Shorrs' restaurant. Doubles are dime-a-dozen in the JFK ... and as a matter of fact in many of the other murderscarried out by THE Conspiracy.

Fact ememrges out of theory and can be etched in granite when Witt's testimony is set alongside Willis 5. There is TUM, his OFL, Overhead Flêchette Launcher aloft and open over his head 3/4 of a second after he has wounded the President. Witt never seems to have seen this photgraph. (that's hard to believe).

> ....I continued to move forward and finally got this umbrella up in the air .... other people .... saw the President shot .... I did not see this because of this thing in front of me.... (HSCA, Vol IV, p 433)

Trembling in fright, pressured as it was by arrogance fraught with ignorance, this testimony cries out for forgiveness. The Conspiracy Museum is ready to help this decent human being out of his trap.

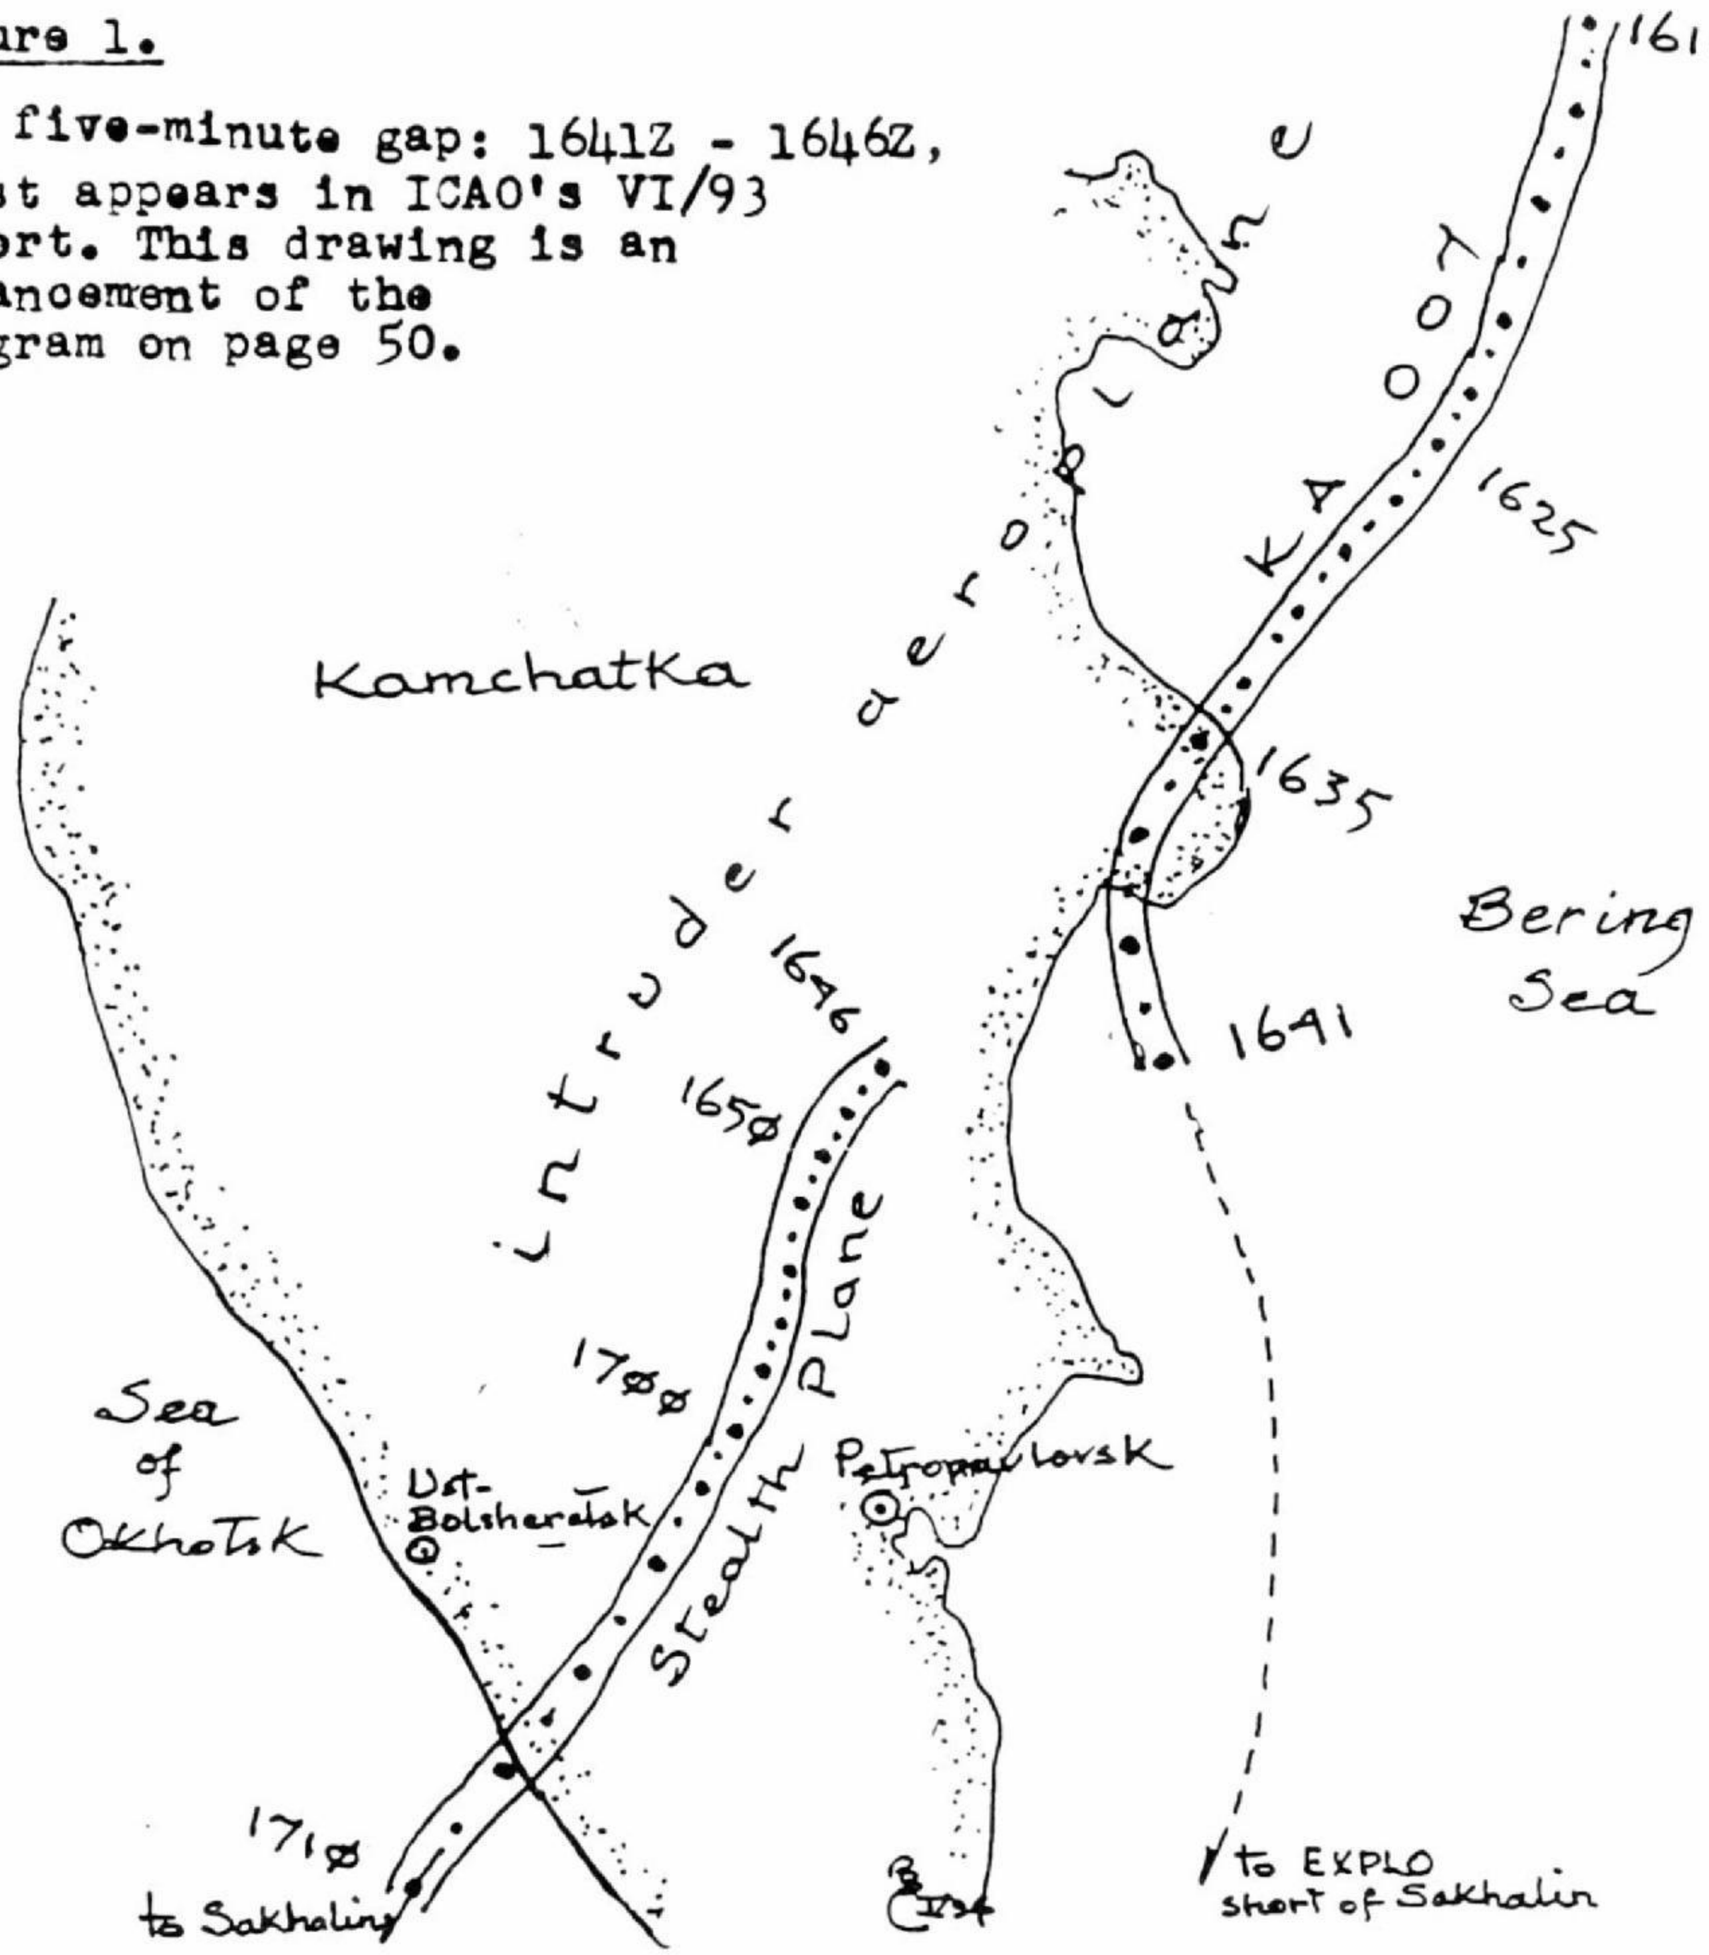
KA 007 and TRACK

THE FIVE-MINUTE GAP IN THE INTRUDER AEROPLANE

Figure 1.

The five-minute gap: 1641Z - 1646Z, first appears in ICAO's VI/93 report. This drawing is an enhancement of the diagram on page 50.



To their credit the Soviets report this five-minute gap in the radar track of their target, the intruder aeroplane. They attribute what GKG shows as KA 007's peel-off southerly as one more damn RC-135 joker sounding the red alert alarm at Ø14Ø local time just for fun.

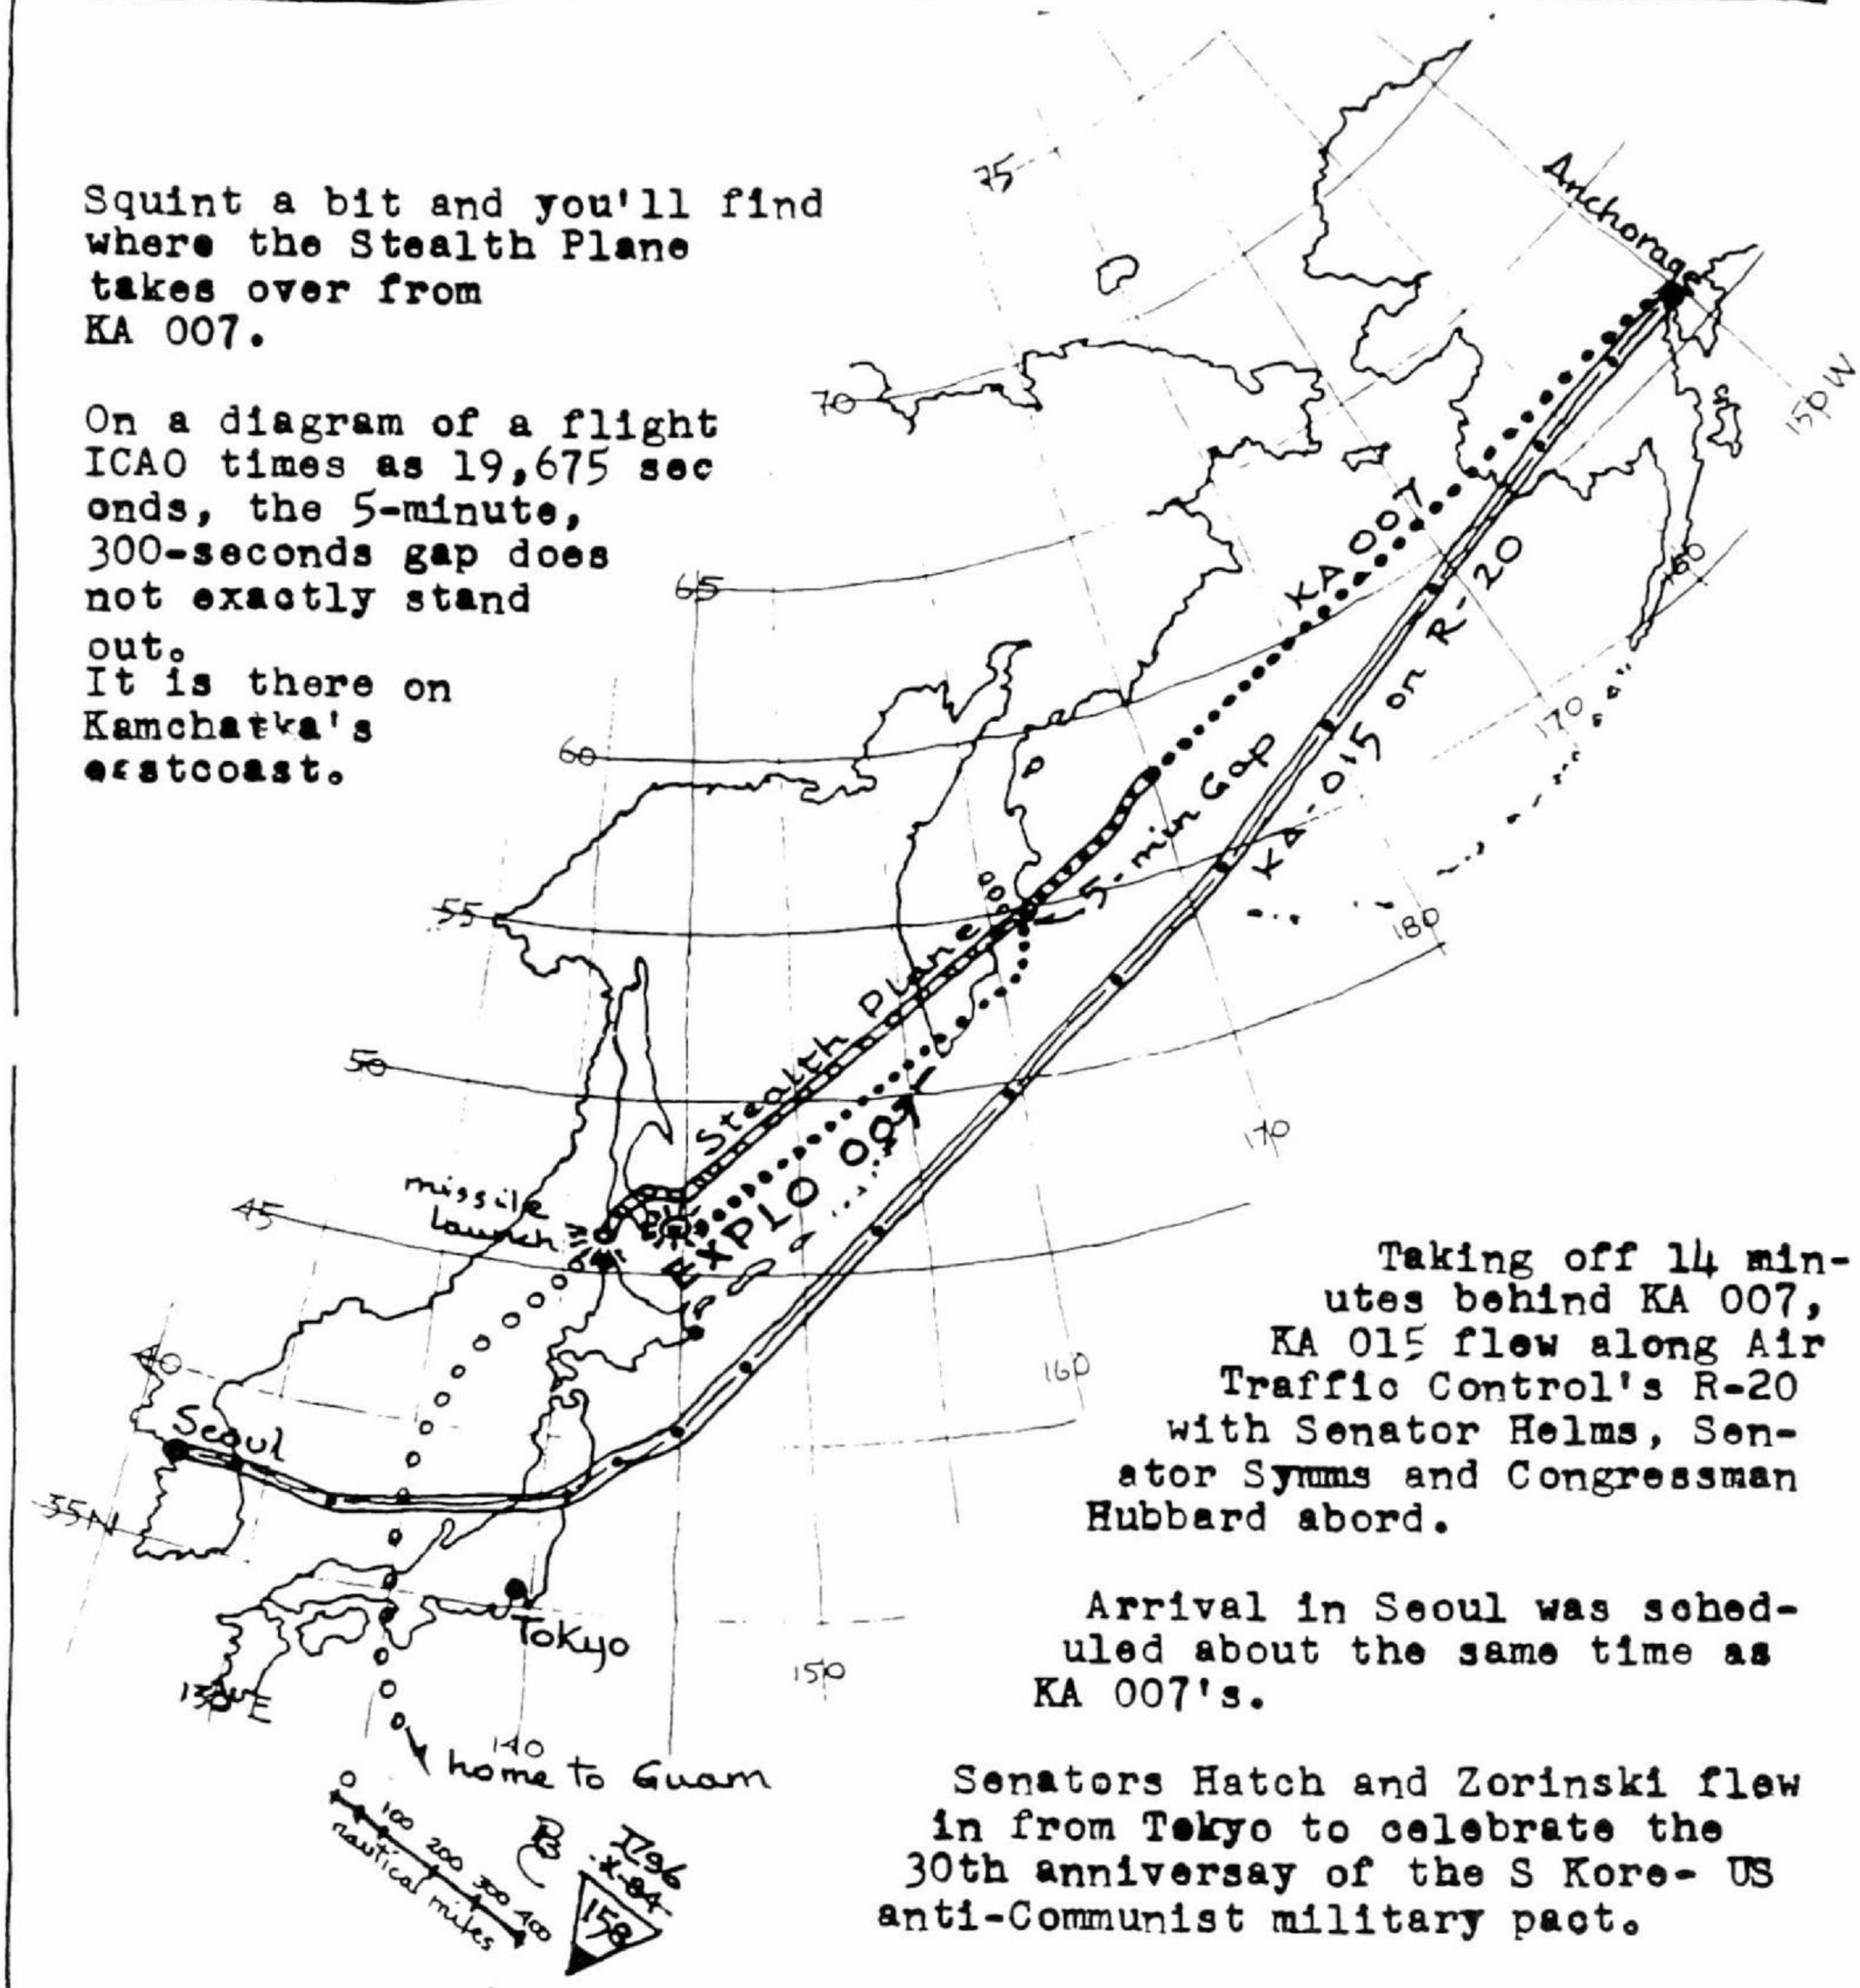
GKG uses this gap to change KA 007's flightpath for the last time.

Five minutes later the Soviets have a real live flying intruder target and they don't know where it comes from but there it is. Their scramblers never locate the Stealth Plane.

CONGRESSIONAL DELEGATION TO SEOUL

Squint a bit and you'll find where the Stealth Plane takes over from KA 007.

On a diagram of a flight ICAO times as 19,675 seconds, the 5-minute, 300-seconds gap does not exactly stand out.
It is there on Kamchatka's eastcoast.



Taking off 14 minutes behind KA 007, KA 015 flew along Air Traffic Control's R-20 with Senator Helms, Senator Symms and Congressman Hubbard abord.

Arrival in Seoul was scheduled about the same time as KA 007's.

Senators Hatch and Zorinski flew in from Tokyo to celebrate the 30th anniversay of the S Kore- US anti-Communist military pact.

Figure 2 (Fig 1 on TCM's readerboard, page 7)

This change in KA 007's flightmust be the fifth ...it is the last. Overflying Kamchatka always seemed a bit to much to ask of KAL. The five-minute gap in the VI/93 report seemed to be a natural way out of this dilemma. . It is still one helluva junket.

EXPLO 007 on TCM's READERBOARD

EXPLO 007 : by exploding a Korean airliner into the Sea of Okhotsk, THE Conspiracybamboozles the world into believing it is a Soviet "Shootdown" into the Sea of Japan.

Figure 1 : (Fig 2, GKG pg 6) ignoring the ATC R-20 flightplan, KA 007 (red dots) drifts northerly off-courseto become the Soviet's "intruder aeroplane". Over Kamchatka, as KA 007 peels off southerly to land Congressman Larry McDonald, John Birch Society president, on Sakhalin Island, a US Stealth Plane (brown dots) takes over the intruder aeroplane job.

THE Conspiracy's scheme to embarass the Communist enemy by showing it shooting at an off-course, lost civilian airliner being guided to a safe landing-field, succeeds one-thousand fold.

DETAIL : (Fig 3, GKG p 8) as KA 007 flies in over the Sea of Okhotsk, the Stealth Plane screws-up a fighter-pilot's missile-launch, fakes "sheetdown" into the Sea of Japan and flies away home.(to Guam)

At missile-launch, THE Conspiracy's fear of KA 007 and its Congressional junket stealth gear being impouded on Sakhalin. triggers EXPLO 007. The B-747, its cargo, baggage and 269 innocent souls vanish.

Nine days later the first debris surfaces in the Sea of Okhotsk 200 miles from the Sea of Japan crashsite. Awash in hate, the world brands the Soviet Evil Empire the Seat of International Terrorism.

Finding KA 007's remains, Moscow clams-up. KGB then knows the CIA knows the KGB knows who explodes KA 007 and why.

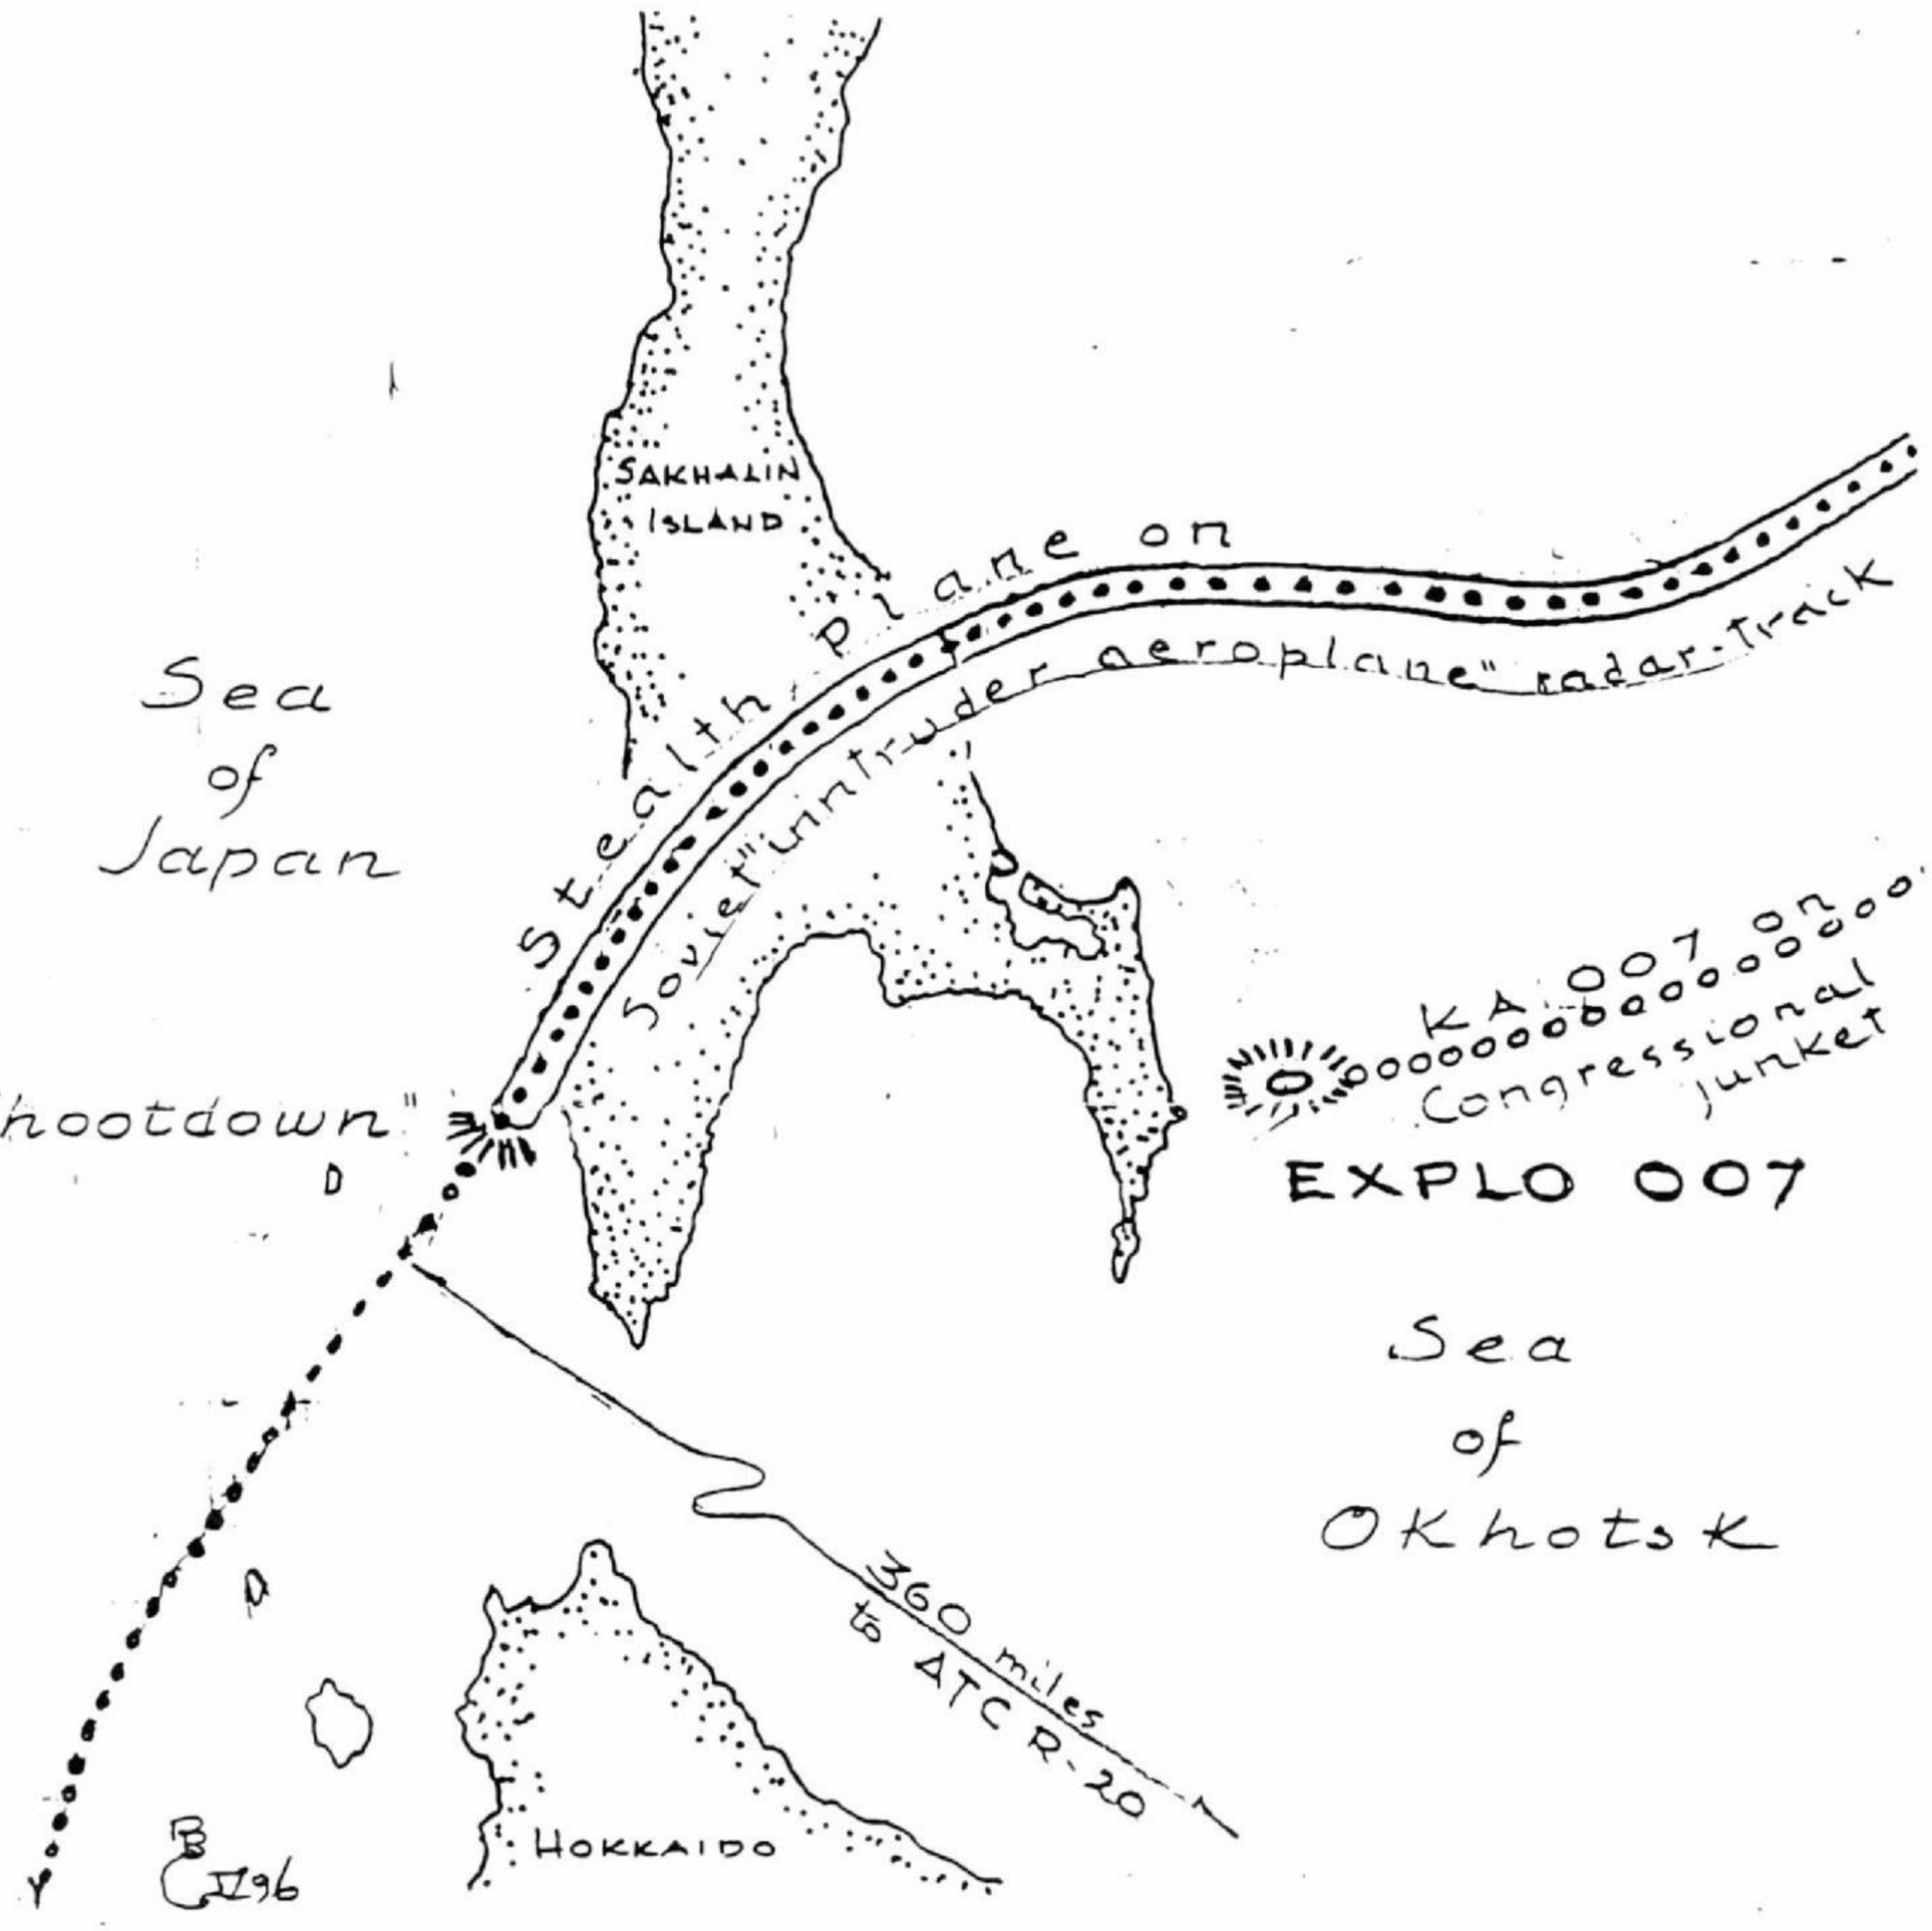
Three years later, diplomatic blackmail persuades THE Conspiracy to join the USSR in signing the disarmament treaty at Reykjavik.

War as a way of Life is dead.

Ahimsa, nonforcefulness, in this neghborhood we all call Earth is YOUR responsibility.

TCM's readerbaords are arranged horizontally in three sections firectly under the wall-hung maps. On your next Dallas convention be sure and stop by and check THE Conspiracy's exposé.

"SHOOTDOWN" + 48 secs = EXPLO 007



The distance between "Shootdown" and EXPLO is 100 miles, give or take a few.

The remains were recovered at 46° 23' N x 143° 46' E

There must be 100 potential canaries, two of which are embarassed with the cheap remuneration awarded the vitims' families ... any leads, call 214 741-3040... thankyou.

GKG·8··III/96

Ahimsa to all, and to all a goodnight...
